Profile Summary

CSE graduate with experience in data analytics, machine learning, and dashboard development. Proficient in Python, SQL, Excel, and Tableau for data cleaning, visualization, and insights. Experienced in building data-driven solutions using ML for analysis and prediction. Skilled in KPI tracking, reporting, and turning data into actionable insights

Education

BRAC University , Dhaka	2022 – Feb 2026
B.Sc. in Computer Science & Engineering	3.82/4.00
Chattogram Collegiate School and College , Chattogram	2020
Higher Secondary Certificate (HSC)	GPA: 5.00/5.00

Skills

Data & Analytics: SQL, Microsoft Excel, Google Sheets, Data Cleaning, Data Visualization, Reporting

Business Intelligence: Dashboards, KPI Tracking, Root Cause & Trend Analysis

Tools: Tableau, Pandas, NumPy, Git, GitHub, Asana, Notion, Microsoft Teams

Programming: Python, C++, C#, Assembly, .NET Core

Experience & Leadership

- **Software Development Intern — Square Informatix Ltd.** Feb 2026 – April 2026
Collaborated with cross-functional teams to develop software solutions, analyze requirements, and support data-driven decision-making through testing and reporting.
- **Director, R&D — BRAC University Computer Club (BUCC)** 2022 – 2026
Led 70–90 members; founded Research Wing and organized workshops, improving collaboration and engagement.
- **Member of Machine Vision and AI Team — BRACU Duburi** 2024 – 2025
Developed and collaborated on computer vision and AI-based projects as part of BRACU Duburi, an underwater robotics and research team focused on autonomous systems and innovation.
- **Instructor of Robotics — Octobrain** 2024 – 2025
Trained 50+ students; simplified technical concepts and improved engagement.

Professional Training

- **Certificate on Data Science**
Hands-on training in end-to-end data science lifecycle: EDA, Feature Engineering, Machine Learning, Time Series Forecasting, Model Deployment, and MLOps. Organized by the Bangladesh Government, ADB, BRAC University, and SICIP.

Projects

- **E-Commerce Operations & Sales Analytics Dashboard (Tableau)**
Built an interactive Tableau dashboard to track sales trends, B2B/B2C performance, and fulfillment KPIs, enabling data-driven operational insights.[Link]
- **Customer Churn Prediction**
Machine learning project to identify customers at risk of churn. Conducted data preprocessing, feature engineering, model evaluation, and trend analysis to support data-driven retention strategies. [Link]
- **Data-Driven Fall Detection System**
Built a YOLOv8-based CNN-LSTM fall detection system achieving 98.48% accuracy with real-time web deployment.

Achievements

- Winner – Best Thesis Award 2025, BRAC University
- Author — ICCIT 2025 research paper [Link]
- Founding member — BUCC A.M. Turing Research Wing [Link]
